FELT COVER FOR INFINITUS

Infinitus felt cover sold per length of **1200mm**. Easy to cut to size and easy to install.

FELT ADVANTAGES

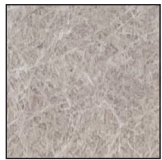

Made from **environmentally conscious material**, rPet is recycled from plastic bottles. By using rPET, you're repurposing plastic waste that would otherwise end up in landfills or oceans. rPET reduces plastic waste.

Sound absorbing, the densely packed fibers work to prevent the transmission of unwanted sound waves.

Fire retardant, slows down the spread of fire and reduces its intensity.

Moistureproof and **mouldproof**.

Safety, the felt cover prevents fingers and foreign objects from touching the 240V internal track.

COLOURED COVERS

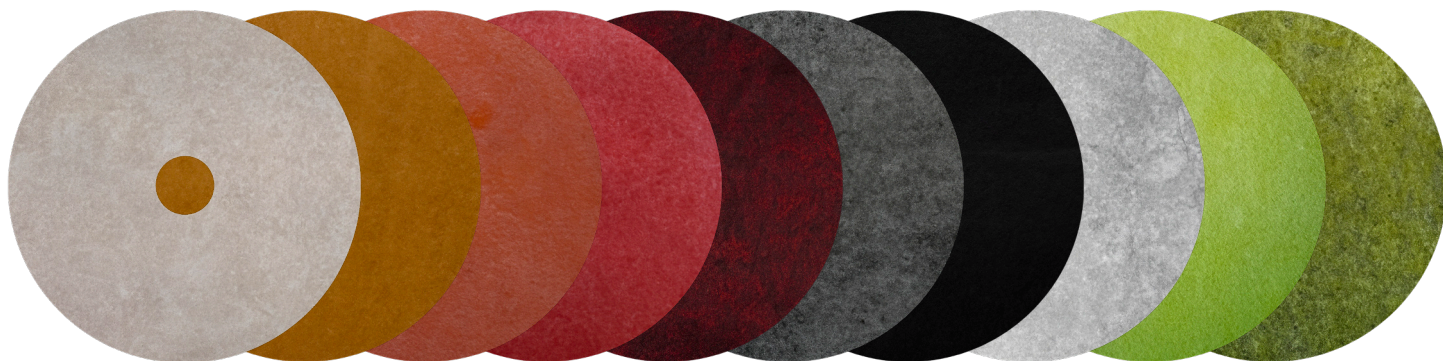

Adding coloured felt covers to your track system is a fun and easy way to bring personality and vibrancy to any space. Whether you're looking to match your décor or create a bold accent, the colourful options let you get creative and make your lighting truly your own.

rPET is a strong, long-lasting, and resilient material, making it ideal for felt covers or discs (discs for LOPAL pendants, see page 12) that may experience wear and tear.
