# micro line

220-240VAC | miniature monophas track

In addition to its miniaturization and small dimensions, the Micro Line is a new 220V-240V track system that includes options for spotlights and pendant lighting fixtures.

The Micro Line delivers a wide variety of configurations that guarantee high flexibility.

Available in black, white and bronze. It will seamlessly fit into any room where aesthetics and attention to detail are important.

Standard installation as surface mounted track, optional installation as recessed track.

## Feeder

TR0318B

TR0318W

The feeder provides power to the start or end of the micro line track.

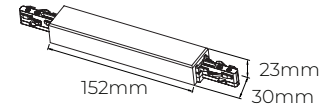

## Center feeder large (only for surface installations)

TR0312B

TR0312W

The center feeder connects 2 pieces of track together in a straight line and can provide power to the track. The larger feeder allows for easy access to internal connections.

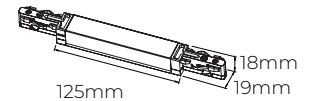

## Center feeder small (for surface + recessed installations)

TR0313B

TR0313W

The center feeder connects 2 pieces of track together in a straight line and can provide power to the track. The smaller feeder is perfect for recessed installations, it is the same size of the track.

## Micro Line tracks and components

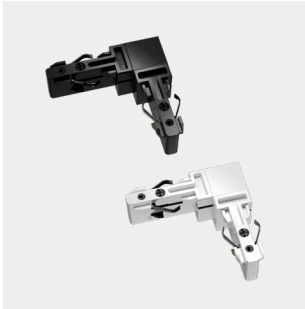

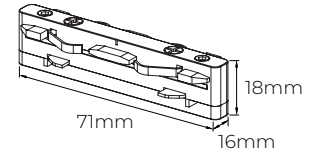

### Linear mini connector

TR0311B

TR0311W

The linear mini connector connects 2 pieces of track together in a straight line, but does not provide power to the track.

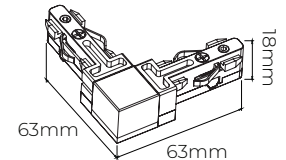

### L-connector

TR0314B

TR0314W

L-connectors allow L shapes to be made.

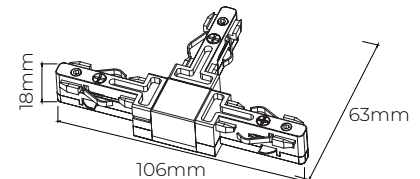

### T-connector

TR0315B

TR0315W

T-connectors allow T shapes to be made.

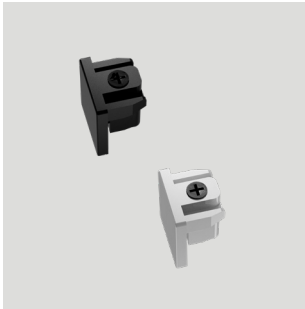

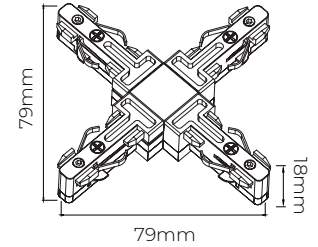

### X-connector

TR0316B

TR0316W

X-connectors allow X shapes to be made.

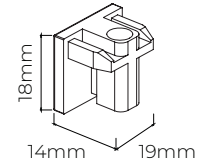

### Endcap

TR0320B

TR0320W

Endcaps are used at the end of the micro line track.

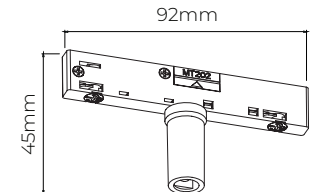

### Track adapter

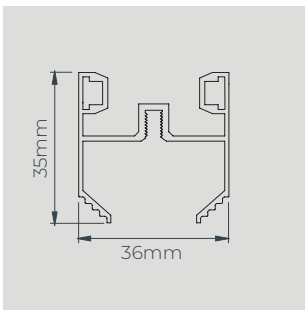

TR0323B

TR0323W

Track adapters are required to install pendants on the micro line track.

## Micro Line recessed accessories

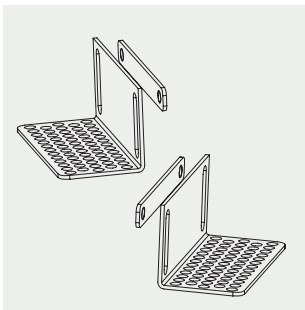

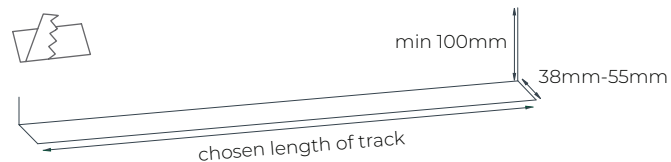

### Micro Line recessed profile

TR03000

L: 3000mm

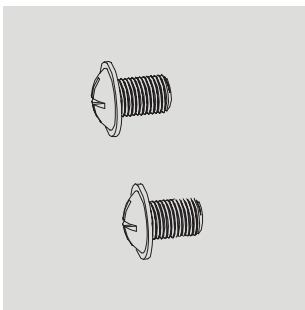

H: 35mm

B: 36mm

### Mounting wings for recessed installation

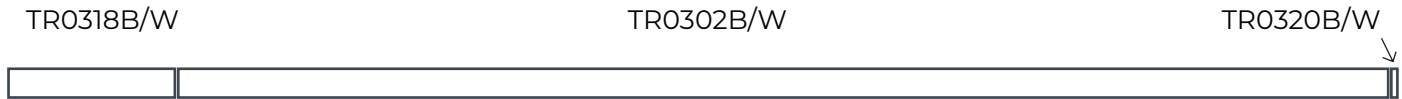

TR03001

### Screws for recessed installation

TR03002

## Example configurations of simple surface installations:

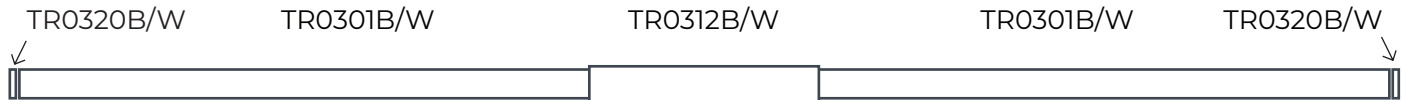

The most used configuration, where the **power source is at the start** (or end) of the track.  
(example uses a 2 meter track)

Used components:

Feeder **TR0318B/W**

Track **TR0302B/W**

Endcap **TR0320B/W**

For installations where the **power source is situated around the middle** of the track.

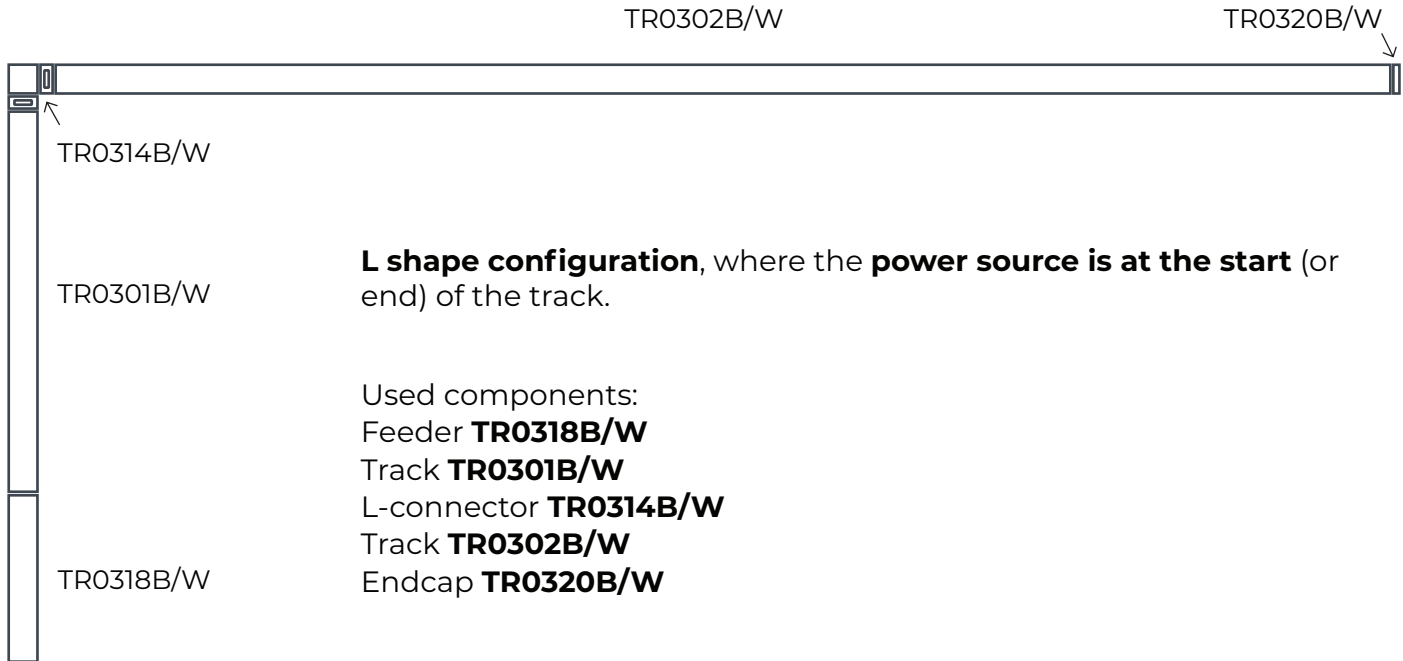

Used components:

Track **TR0301B/W x2**

Central feeder **TR0312B/W**

Endcap **TR0320B/W x2**
